NL1

### ● General

- protect people against indirect contacts and additional protection against direct contacts.
- protect installations against fire hazard due to insulation faults.

### ● Detectable wave form

- AC Class  
Tripping is ensured for slowly increasing sinusoidal AC residual currents.
- A Class  
Tripping is ensured for sinusoidal AC residual currents and for pulsed DC residual currents, whether applied suddenly or increasing slowly.

### ● Tripping sensitivity

- 30mA - additional protection against direct contact.
- 100mA - co-ordinated with the earth system according to the formula  $\Delta n < 50/R$ , to provide protection against indirect contacts;
- 300mA - protection against indirect contacts, as well as fire hazard.

### ● Tripping time

- Instantaneous  
It ensures instantaneous tripping (without time-delay).
- Short time delay   
It ensures any tripping at least 10ms.
